

### Dose Schedule:

The feline patient should receive one tablet (350 mg) twice daily, or as directed.

### Special Information:

Formulas can be administered in a variety of ways, including:

- Whole tablet or crushed
- Given directly or mixed with food
- As a powder suspended in water given by oral syringe

To encourage acceptance, place one tablet beside the food bowl for 2-3 days prior to mixing with food.

### Amount per 1 Tablet (350 mg):

#### Proprietary Blend **290 mg**

Porcine jejunum, bovine liver, porcine stomach, L-glutamine, porcine duodenum, bovine spleen, ovine spleen, defatted wheat germ, rice bran, nutritional yeast, bovine kidney, organic alfalfa (aerial parts) juice powder, New Zealand green mussel (*Perna canaliculus*) (shellfish), and veal bone PMG™ extract.

**Other Ingredients:** Calcium stearate and honey.

*Please consult the actual product label for the most accurate product information.*

### BENEFITS:

- Provide general digestive system support
- Support the ability of intestinal cells to function, regenerate, and respond to daily metabolic and immune challenges

### INDICATIONS FOR USE:

- General enteric support
- Patients with increased metabolic demand
- Hepatic patients in need of additional enteric support

## Nutritional Support for Enteric Health

Feline Enteric Support is a nutritional supplement designed to support the normal function of the digestive system and the ability of intestinal cells to regenerate. A healthy digestive tract is critical to overall health and well-being. In addition to the breakdown and absorption of nutrients, digestive health can also have a significant impact on other body systems.

### FEATURES:

#### Animal-based ingredients

### BENEFITS:

Formulated to contain a variety of functional foods, both plant and animal, that "feed" the various components of the digestive system, Feline Enteric Support provides targeted digestive support. Animal-based ingredients include organ and glandular tissues, as well as specialized protein extracts, which contain a unique profile of peptides and nucleotides.

- Organ and glandular extracts (like stomach, duodenum, jejunum, and liver) provide naturally occurring enzymes, peptides, and cofactors that support tissue-specific health.
- Organ meats contain higher concentrations of DNA, unique protein profiles, and essential vitamins and minerals.
- All raw animal tissues used are USDA-approved and sourced from facilities inspected by the USDA or the Canadian Food Inspection Agency (CFIA).<sup>1</sup>

## FEATURES:

Whole food-based ingredients

## BENEFITS:

This synergistic blend of nutrient-dense ingredients offers a holistic approach to digestive tract health.

- L-glutamine is an amino acid that serves as a primary energy source for enterocytes, promoting regeneration and maintaining mucosal integrity.<sup>2</sup>
- Defatted wheat germ is a beneficial source of vitamin E and contributes to antioxidant defense mechanisms in the body.
- Nutritional yeast contains bioactive components, including beta-glucans, mannan oligosaccharides, nucleotides, and vitamins. These compounds support a healthy digestive terrain and immune health.<sup>3</sup>
- New Zealand green mussel (*Perna canaliculus*) (shellfish) contains omega-3 fatty acids (especially EPA and DHA) and unique glycosaminoglycans (GAGs) that help modulate inflammatory processes.<sup>4</sup>

## FEATURES:

Organic alfalfa (aerial parts) juice powder from the Standard Process organic farm

Alfalfa

## BENEFITS:

While basic nutrition for cats supports their essential needs, amino acids, vitamins, and minerals, whole food-based supplements can help fill any nutritional gaps, especially for cats going through everyday stressors.

- Alfalfa contains vitamins (A, C, K, E, B-complex) and minerals (calcium, magnesium, iron) which support overall health, including liver function and immune system strength.

## Synergistic Products

For a complete list of products, visit [standardprocess.com/Veterinary-Formulas](https://standardprocess.com/Veterinary-Formulas)

### Feline Whole Body Support

Provides general multisystem support

### Feline Hepatic Support

Supports liver metabolism, hepatic circulation, bile production and flow

### Feline Renal Support

Facilitates the support and natural rehabilitation of the kidneys

### Feline Immune System Support

Provides nutritional and biochemical support for healthy immune cells and tissues in cats

Human-Quality Ingredients

Family-Owned Company

Certified Organic Farm

## Healthy Soil. Healthy Plants. Healthy Lives.

Our mission of helping people and animals starts on our certified organic farm.

Organic certification ensures that there are no synthetic pesticides and no genetically modified organisms (GMOs) used to grow our crops.

Our expertise in cultivating healthy soil allows us to maximize the nutrient density in our products. This helps us deliver nutrition that's as close to nature as possible and make products that have changed lives for over 95 years.
